GATEWATCHER

Cybersecurity
for *business serenity*_

About Gatewatcher_

A leader in the detection of cyber threats, Gatewatcher has been protecting critical networks of companies and public institutions worldwide since 2015. Our Network Detection and Response (NDR) and Cyber Threats Intelligence (CTI) solutions analyze the vulnerabilities and quickly detect and respond to cyber-attacks.

Thanks to the convergence of AI and dynamic analysis techniques, Gatewatcher delivers a real-time 360-degree view of threats, covering both cloud and on-premise infrastructures.

Our *journey*_

2015

Established in France

> Creation of Gatewatcher by Jacques DE LA RIVIÈRE and Philippe GILLET
> Gatewatcher obtains ANSSI qualification (French Cyber Agency)
> Winner of the French Tech Pass
> Founding member of the Paris Cyber Campus
> Member of the European OpenXDR alliance

2021

International *expansion*

2022

> Fundraising, A series
> Named a Representative Vendor in the 2022 Gartner® Market Guide for Network Detection & Response
> The opening of 6 offices and a network of 80+ partners worldwide
> Multiple awards winner: Computing Security Awards, French Tech 2030 program, EY Numeum Innovation - TOP 250

Our products_

Interoperable with your security ecosystem, our products integrate seamlessly with your SOC and IT services, and are immediately ready for use.

At Gatewatcher, we give you the power to protect your network and the peace of mind you need to focus on your core business.

NDR_

Cornerstone of your cyber ecosystem_

Gatewatcher's **NDR** (AIONIQ) enables you to identify and characterize threats as quickly as possible, so you can take global remediation action and minimize disruption to your business from cyberattacks. Illustrated within a unique multi-engine detection and response platform, benefit from 360° visibility through immediate mapping of all types of assets and users present on your IT Systems.

Thanks to our **COCKPIT** and **REFLEX** modules, you can speed up your SOC analysis, centralize handling of security incidents with full support for multiple business units and flexible role-based access control.

By combining NDR and CTI, adopt a proactive approach to manage your cyber risks, so you can focus on your core business!

Visibility

Rapidity

Control

CTI_

Enhance your detection and investigations with *cyber intelligence_*

Gatewatcher's **CTI** enables you to immediately improve your detection capabilities in the face of any kind of threats, by providing you with enriched indicators of compromise tailored to your specific context.

Integrated within **COCKPIT** and **REFLEX**, cyber intelligence supports your SOC's analysis and investigations to enrich their detection with a better understanding and knowledge of the threat, and to adapt their response. Your cyber experts can then provide an accelerated operational response focused on your business.

By combining our NDR and CTI, strengthen your defense system with comprehensive, early protection against cyberattacks.

Analysis

Rapidity

Contextualisation

TAP_

*A continuous security_*

Gatewatcher offers a complete range of optical and copper **TAP**s to help you monitor your traffic, whatever your media type or network speed.

Access your network without interrupting connectivity thanks to our passive, unpowered TAPs. Reliably duplicate your traffic for in-depth real-time analysis, without placing any load on your network devices.

Cover all your monitoring and detection needs, while offering you total visibility.

When Generative AI *revolutionizes* SOC_

Generative AI_

Generative AI opens a new world for every cybersecurity expert.

Through the power of generative AI coupled with the value of its detection, Gatewatcher revolutionizes SOC and confirms its place as a leader in cybersecurity.

## TECHNICAL & OPERATIONS

AUGMENTED SOC_
> Explain complex alerts
> Correlation with AI
> Best Practices Advisor

INTERACTIVE ASSISTANT_
> Configuration accelerator
> Troubleshooting
> KB Awareness

OPERATION ENRICHMENT_
> AI Enriched alerts & metadata
> Multi source enrichment
> OpenCTI integration

REPORTING ASSISTANT_
> Alert / Threat Summary
> Notifications
> Dashboarding

ORCHESTRATION & REMEDIATION_
> Interaction with EDR/FW/XDR
> AD / AZURE AD / O365
> Gatewatcher API aware

OPERATIONAL CYBER ASSISTANT_
> Rule generation by AI
> Threat Hunting by AI
> Tag / Notes / Triage by AI

What our customers say *about us*_

4,7/5

★★★★★

Gartner
Peer Insights™

In Network Detection and Response rating
16 ratings as of date 01/2024*

Unrivalled protection_

> By constantly providing them with an unprecedented level of detection

> By adapting our technologies to the constantly evolving TTPs used by cyber attackers

> By guaranteeing our customers a consistent level of service across all types of deployment (cloud, on premise, hybrid).

Ahead of the threat _

> Thanks to the constant monitoring of our CTI and Purple teams

> Through the interoperability of our solutions with the cybersecurity technologies on the market

> Through real-time detection, because slow response is never an option when it comes to cyber risk.

100% repeat business_

> By adapting to the specific characteristics of each user to provide them with a tailor-made level of information for greater clarity

> Being irreproachable in terms of the quality of our products and minimizing the impact of the integration phase on our customers' operational environments

> Thanks to the Customer Success Management (CSM) approach implemented for each of our customers.

"Deployment Of NDR In Hospital"

"Why We Streamlining Deeper Network Threat Detection With AI-Powered NDR"

Submitted Nov 27, 2023

5.0 ★★★★★ Overall User Rating

Product(s): Gatewatcher AionIQ

Overall Comment: "In today's rapidly evolving technological landscape, building strong partnerships with vendors is crucial, particularly when it comes matters of cybersecurity. This is where Gatewatcher truly shines. With their dedication to delivering exceptional results, the company has been instrumental in helping us successfully navigate many use cases. Their in-depth approach to every project is what sets them apart and guarantees success. "

Use cases_

Develop and improve my detection and protection capabilities_

> Detect and process the first signals of an intrusion
> Increase the efficiency of a SOC
> Enrich your ecosystem with cyber threat intelligence (CTI)
> Minimize the impact of breaches when they occur

Master and control user's behaviour, applications and data_

> Detect on-premise (leveraging air gaps where necessary)
> Protect against data exfiltration and identity theft
> Respond to regulatory challenges (EU)
> Optimize cyber insurance

Building my cyber ecosystem with NDR at the keystone_

> Improve the quality and the speed of response to threats
> Rationalize my cyber security toolkit
> Reinforce my EDR
> Combine NDR and cyber intelligence (CTI)

Proactively identify cyber threats_

> Detect new vulnerabilities
> Reveal weak spots across the network's defenses
> Master your post-security incident recovery
> Provide reliable information to analysts

Understand the digital blueprint of my organization_

> Maintain an exhaustive inventory of assets
> View and map the links between my assets
> Reduce shadow IT
> Understand the IT/OT uses on my network (including non-compliant ones)

Protect my Cloud environment_

> Master my private or cloud environment
> Secure my Microsoft environment
> Detect threats in a public cloud environment (Azure / AWS / GCP)
> Cross-check both internal and external alert signals (E/W & N/S)

Adapt detection to my specific environments_

> Identify lateral movements towards industrial/operational technologies
> Secure infrastructure against attacks via connected assets
> Protect against threats facing the supply chain
> Protect API communications (M2M)
> Secure both distributed and multi-site infrastructures (SD-WAN and MPLS)
> Anticipate cyber intrusions in healthcare environments
> Engage in cost-controlled security for VSEs/SMEs and local authorities

Our partners_

We partner with a network of certified and trained professionals to simplify and accelerate the integration of our security solutions. Our goal is to ensure the deployment of a more effective and efficient cyber protection strategy.
