

# Generative AI Assistant

Revolutionize your SOC thanks to GAIA, your **Gen AI assistant**

## Gen AI, a **new dimension** for your cybersecurity

Since the introduction of Chat GPT, we have seen the widespread adoption of **Large Language Model(LLM)**, which is generating a great interest from both a defensive and offensive point of view and becoming a structuring element in cybersecurity for all organizations

Our R&D team is offering you a new experience with **GAIA**, combining the **power of generative AI** with **Gatewatcher's unique value** in incident detection, qualification, analysis and response.

*GAIA is the next essential step for your SOC!*

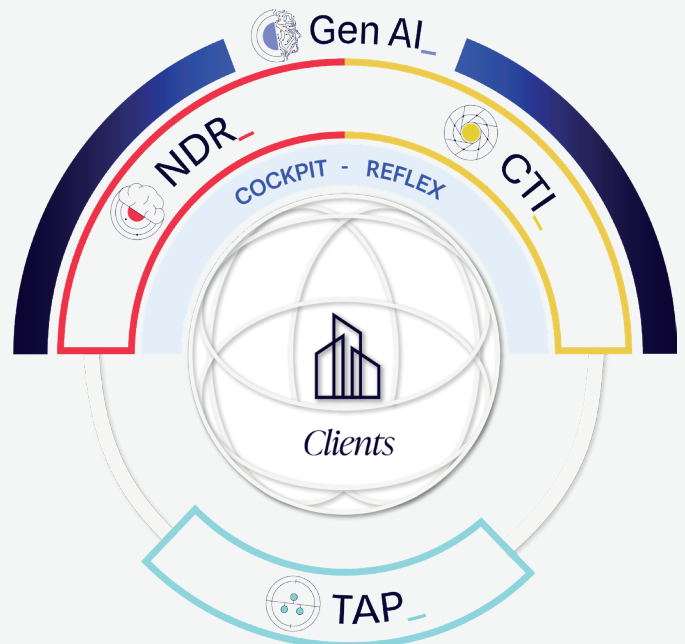

“ Attackers should not be the only ones to benefit from the Gen AI advantage ”

## GAIA, at a **glance**

**GAIA** is interoperable with all Gatewatcher products.

Based on controlled, qualified and robust sources, your AI assistant will help you on a daily basis with:

- > Your recurring integration and operational tasks
- > The definition of your security policies
- > The identification, understanding and qualification of your incidents
- > The rapidity and personalisation of your remedial actions

## GAIA is an **assistant**

*Interactive*

*Technical*

*Operational*

## Your **business value**

### ✔ *Enriched* incidents\_

Get rapid access to a vast amount of summarized information, linked to your alerts

### ✔ *Simplified* incident handling\_

Make it easier for your analysts to investigate and prioritize their tasks

### ✔ *Fast* remediation\_

Accelerate your incident response for perfect operability

### ✔ *Data privacy*\_

Secure your information with a product "secured by design"

## GAIA **guarantees**

Because *safety* and *efficiency* are our priorities, our solution takes into account certain key principles:

### A *quality response*\_

- > Sorting of sourced knowledge bases (data sets)
- > Control and standardization of all data sources
- > Uniqueness of knowledge base

### Human *validation*\_

- > Human control and approval
- > Accuracy and clarification of contextual information when a discussion is initiated

### Reduced *data exposure*\_

- > Training of our model without using user data
- > Minimization of data exchanges
- > No sensitive data is sent thanks to a model that is "binding" by design

### A *safe use*\_

- > Encryption of all stored data (AES 256)
- > Secure data transmission (TLS 1.2/1.3)
- > Infrastructure and fine tuning of our LLM, "secured by design"
- > Reduction of hallucinations and deviations

## About us\_

- > Leader in advanced threat detection
- > Innovative NDR technology with cutting-edge AI
- > 360° detection enhanced by our CTI
- > A large network of international partners, CISOs and analysts who place their trust in us - MEA, APAC, Europe
- > Recognised for our expertise
