GATEWATCHER
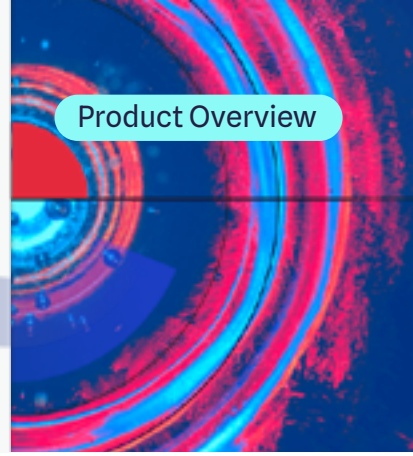

Optical TAP - Monomode LC TAP

A complete protection with Monomode LC TAP module

> The Monomode LC TAP Module provides a TAP point with an innovative security feature. It **prevents any potential attacks or disruptions** by blocking light coming from the monitor ports.

> Uses the modular chassis for rack mounting, so it can **accommodate up to 24 modules in 1U.**

> The module is delivered with customized security labels, with unique identification that provide **traceability** throughout the supply chain.

> Ensures **total security** and availability for monitored networks, while providing **full visibility.**

Features

> Diode function protects network against light insertion from TAP ports (>35 dB insertion loss on TAP port input blocks all signal)

> Non-intrusive in-line monitoring

> Permanent network link guaranteed

> Monitoring of all 7 OSI layers

> No packet loss, no point of failure

> Passive, unpowered

> Various split ratios available

DiodeTAP blocks light in opposite direction

About us_

Leader in cyber threat detection, Gatewatcher has been protecting the critical networks of major companies and public institutions around the world since 2015. Our Network Detection and Response (NDR) and Cyber Threat Intelligence (CTI) solutions detect intrusions and respond quickly to all attack techniques. By combining AI with dynamic analysis techniques, Gatewatcher provides a 360°, real-time view of cyber threats across the entire network, in the cloud and on premise.
