

Generative AI Assistant

Revolutionize your SOC thanks to GAIA, **your Gen AI Assistant**

Gen AI, **a new dimension** for your cybersecurity

The growing expectations and potential benefits of generative AI technologies are sparking strong interest from both **defensive and offensive** perspectives. Generative AI is now becoming a foundational **component of any cyber resilience strategy**.

Gatewatcher offers a unique and distinctive experience with its **versatile and adaptive cyber assistant**. Highly integrable **within your environment and use cases**, it immediately strengthens your **technical, operational, and decision-making teams** on a daily basis.

GAIA is the next essential step for your SOC!

Attackers shouldn't be the only ones benefiting from the power of Gen AI

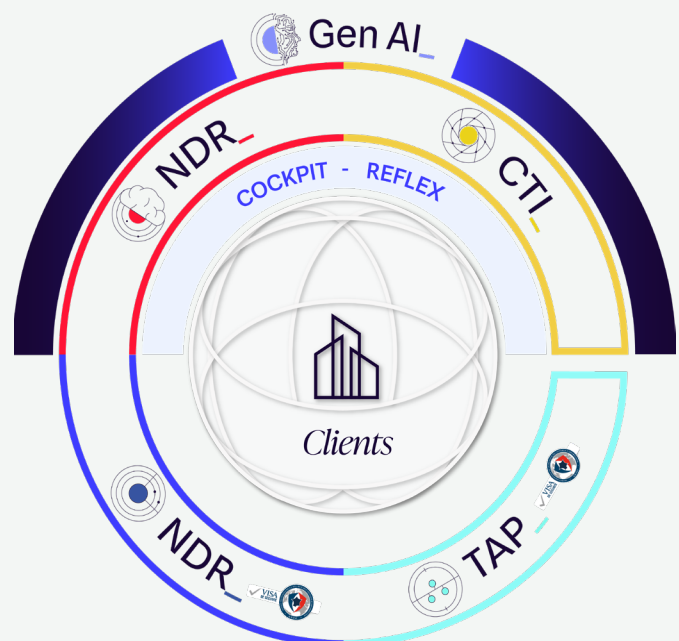

GAIA, **at a glance**

GAIA is **natively interoperable** with your entire technological ecosystem, **with zero impact** on your environment.

It adapts to your use context, data, and access/authorization rules, enabling you to:

- > *Easily deploy* our assistant without modifying your environment
- > *Interact with all your cyber solutions*, network, and systems from a single assistant
- > *Enrich usage context* based on your needs and challenges
- > *Accelerate routine operations* and remediation tasks with ease
- > *Refocus your teams* on high-value-added activities

GAIA as **an assistant**, is

Interoperable

Adaptive

"Plug-and-Play"

Versatile

Accessible

Your **benefits**

✓ *Extended* interconnection_

Interact natively
with your
ecosystem

✓ *Simplified* operations_

Better
understanding of
your environment
and the threats
affecting it

✓ *Natural* interaction_

With your existing
tools for optimized
identification,
qualification,
and response

✓ *Facilitated* communication_

Between teams,
but with
decision-makers
also

Our **approach**

Because *security* and *efficiency* are our top priorities, our solution is built upon key principles:

Adaptive *contextualization*_

- > Personalized enrichment for each user
- > Incorporation of data classification levels
- > Segmented information and user context

*Agents*_

- > Specialized interactions
- > Reliable interactions and dialogues
- > Tailored to your business context

Versatile interoperability_

- > Our “Tools” feature connects with any of your existing systems
- > Compatible with both in-house and third-party tools
- > Fast, flexible actions, customizable via our functionality “Context Menu”

*Simplified deployment*_

- > No changes to your infrastructure
- > No changes to your security policy
- > Based on your existing authorization schemes

About us_

- > Leader in advanced threat detection
- > Cutting-edge NDR technology powered by AI
- > 360° detection enriched by our CTI
- > A broad network of trusted partners, CISOs, and analysts worldwide:
EMEA, APAC, Europe
- > Recognized for our cybersecurity expertise
